

Pipeline A vs. Pipeline B Comparative Preprocessing Report

Project: Fingerprint | Date: 2026-07-26 21:46:51

1. Controlled Pipeline Comparison Table

Comparative Metric	Pipeline A (Fingerprint-Preserving)	Pipeline B (Traditional NLP)
Target Pipeline Purpose	Preserve Stylistic LLM Signatures	Classical Text Cleaning & Normalization
Total Samples Preserved	5238	5238
Total Corpus Token Count	330,529	175,937
Vocabulary Size (Unique Tokens)	38,631	20,215
Type-Token Ratio (TTR)	0.116876	0.114899
Average Document Length (Chars)	371.95	242.36
Average Sentence Length (Tokens)	15.46	33.59
Characters Removed by Cleaning	0 (Baseline)	678,785
Words / Stopwords Removed	0 (Baseline)	154,592
Unique Vocab Tokens Stripped	0 (Baseline)	18,416
Processing Execution Time	3.42 sec	5.76 sec

Scientific Takeaway: Pipeline A preserves structural and stylistic features crucial for model fingerprinting, while Pipeline B strips 35%+ of vocabulary tokens (stopwords, lowercasing, punctuation) as typical in classical topic/sentiment tasks.
